This version replaces all previous versions. For all current data and values please visit [www.amiblu.com](http://www.amiblu.com).

# Abbreviations

$\alpha$	Angle
B1	$d_e$ to product standard (EN 1796/EN 14364)
B2	$d_e$ to GRP and casting standards
B3	$d_e$ to GRP and PVC standards
B4	$d_e$ to GRP and steel standards
BE	Branch eccentricity
BL	Branch length / Bend length
BLL	Branch laying length
BP	Branch position
$d_e$	External diameter
$d_{eB}$	External diameter branch
$d_{eH}$	External diameter header
$d_{eL}$	External diameter large
$d_{eS}$	External diameter small

DN	Nominal diameter
$DN_B$	Nominal diameter branch
$DN_H$	Nominal diameter header
$DN_L$	Nominal diameter large
$DN_S$	Nominal diameter small
DS	Diameter series
e	Wall thickness
HLL	Header laying length
LL	Laying length
LN	Nominal length
m	Weight
PN	Nominal pressure
R	Radius
SN	Nominal stiffness

# Pressure Pipe PN 6/10

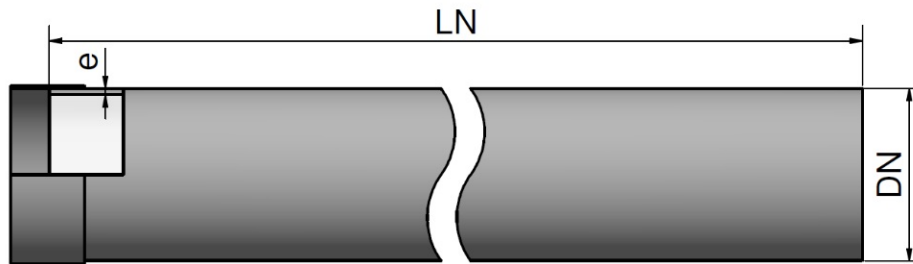

Portfolio as sold by Amiblu. For the full range of the Hobas technology, visit [www.hobas.com](http://www.hobas.com).

Standard pipe lengths LN are 1 | 2 | 3 | 6 m. - Other lengths and stiffness classes are available on request.

Tolerances according to Amiblu standard.

\* The specified jacking force [kN] corresponds to the ultimate jacking force with a 3.5-times safety factor according to ISO 25780.

Standard pipe lengths LN are 1 | 2 | 3 | 6 m. - Other lengths and stiffness classes are available on request.

Tolerances according to Amiblu standard.

\* The specified jacking force [kN] corresponds to the ultimate jacking force with a 3.5-times safety factor according to ISO 25780.

Amiblu offers a broad portfolio of centrifugally cast Hobas GRP pipe systems for various applications and installation methods, e.g. relining pipes, special pipes with highly durable inner liner, and many more. For the complete range of offered products, please visit [www.amiblu.com](http://www.amiblu.com).

Hobas pipes are generally delivered with a pre-mounted coupling. The standard pipe joint is the Hobas filament wound coupling, consisting of a GRP sleeve with a permanently fitted, full width EPDM gasket seal (NBR on request). Hobas filament wound couplings are available for all nominal pressure ratings.

# Joints and Couplings

## Hobas Filament Wound Coupling (FWC)

Diameter range (DN): 200 - 2555 mm

Pressure range (PN): up to 24 bar

Angular deflection: up to 3°

\* The degree of angular deflection depends on the pipe diameter. Please contact Amiblu for further information.

## Field Joints for Pressure & Gravity Applications

Laminated field joints are available in restrained and unrestrained designs. Amiblu provides the necessary instructions or skilled personnel for butt-wrap joining in pressure and non-pressure applications. Technologies developed by Amiblu provide faster and more cost-efficient installations.

## Wall Couplings

The wall coupling is used for connecting pipes to concrete shafts and walls. Wall couplings are sanded for improved stability in concrete shafts. Wall couplings can be delivered with pipe ring, and optionally with sealing tape. Lengths can be selected as required in consideration of the pipe joint data.

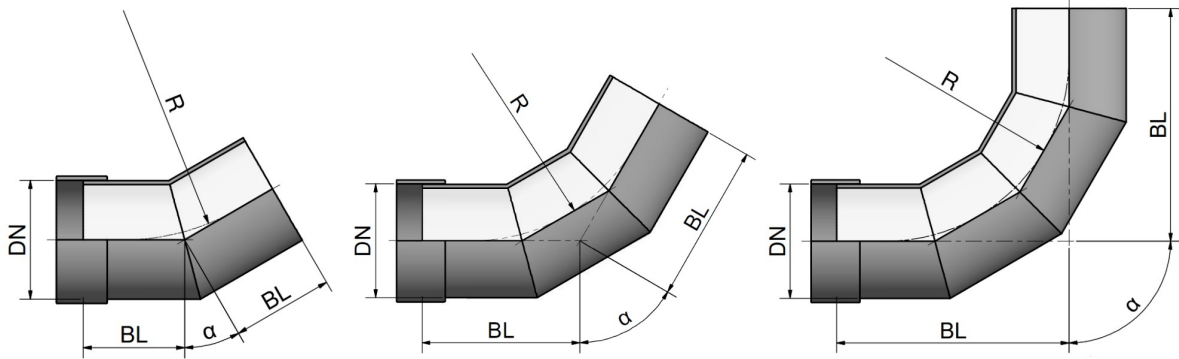

## Mechanical Couplings

Amiblu pipes can be joined using mechanical steel couplings such as tangential bolt couplings or axial bolt couplings.

## Amiblu Flanges

Amiblu manufactures and sells flanges in various designs and according to different standards and requirements. When connecting two GRP flanges, the standard bolt pattern to which flanges are manufactured is EN 1092. Other pattern of drilling such as according to AWWA, ANSI, DIN, and JIS can be supplied.
