

Amiblu is the worldwide leading specialist for pipe systems made of glassfiber reinforced plastics for storm- and wastewater, drinking water, irrigation, hydropower, and industry. Active in 110 countries around the globe, the Amiblu Group employs some 1,500 people and has an extensive network of license partners and sales engineering offices around the world.

To strengthen the Product Development Team in Amiblu Technology AS in Sandefjord, Norway, we are looking for
Civil engineers - design, installation, and application of Amiblu GRP pipes

Full-time, 37.5 h/week

We are looking for skilled and experienced engineers who want to work in an interdisciplinary environment and have extensive collaboration with other companies and licensees in the group. The positions offer professional challenges and require theoretical and preferably, practical orientation and experience.

Areas of Responsibility

- Perform structure and strength calculations on new and existing products
- Perform analysis of pipes and tanks in installation and operation, above and below ground
- Keep up to date on new technology and see the possibilities for product improvements
- Run and participate in development projects from concept stages and research to pilot production
- Provide technical assistance for ongoing projects to Amiblu factories and sales departments
- Prepare and further develop technical documentation for the company's various products
- Assist in the development of product standards to safeguard GRP pipes in the market

Your Profile

- Higher education (MSc, PhD, or equivalent) in water drainage, construction or machinery - preferably with specialization in structural calculations. Other academic backgrounds with relevant experience can be considered.
- Desirable to have several years of work experience.
- Knowledge in glass fibre reinforced composites (GRP), FEA analysis or geotechnics is considered as an advantage but not a necessity.
- It is a prerequisite that candidates for the position are able to create good interpersonal relationships across cultures and geographies.
- Furthermore, it is important to have good written and oral English skills.

We offer:

- Full-time and permanent position
- Exciting work assignments in an international, interdisciplinary environment
- Product development with a focus on future-oriented and sustainable solutions.
- High performance culture and informal lines of communication.
- flexible working hours with competitive salary and employment conditions.

Submission of application:

Please, send applications with CV, diplomas and certificates to jobb@amiblu.com

Questions regarding the positions can be directed to Mr. Högni Jónsson, Product Development & Support Manager hoegni.jonsson@amiblu.com, mobile +47 971 91 728.
